

SAFETYLIGHT OFFERS YEAR ROUND MARKET

SAFETYLIGHT BRACKETS are cast in brass to fit contour of corner posts of cars without filing or fitting. Complete instructions, templates and hardened drill bushing accompany each set of brackets.

Illustrations in Unity Safetylight Catalog Insert, Form No. 110, show how easy it is to install a Safetylight.

Form No. 110 also gives detailed analysis of the electrical and mechanical superiority of SAFETYLIGHT, and why it is an essential SAFETY and CONVENIENCE device that should be on every car, truck and bus.

SUGGESTIONS TO JOBBERS

Safetylights, except "Utility" and "Marine" models, may be ordered with brackets or without brackets, and any brackets desired ordered and billed separately.

It is recommended that jobbers stock Safetylights without brackets—and carry a selected stock of brackets separately. Any set of brackets may be used with either model light, hence a good stock of brackets assures rapid turnover of lights or big profits with low investment.

BRACKET SPECIFICATIONS

Number before dash indicates outside, number after dash indicates inside, bracket. Always list both numbers, thus—60-4, when ordering brackets.

N. B.—When brackets are ordered for cars not listed (Older models, convertible or open model cars) always specify Make, Model and Year of cars for which desired.

FOR RIGHT HAND INSTALLATION

Order right hand lights and right hand brackets, specifying Make, Model and Year of car, bus or truck.

TRUCK—BUS INSTALLATION

Unless otherwise specified above, Safetylights invariably can be installed on trucks and buses with our Universal Brackets, No. 52-23 or 70-4. If further data are desired, write us giving Make, Model and Year of truck or bus.

ROOF INSTALLATIONS

For Roof Installations, we furnish a special short length model, the Unity "UTILITY" Safetylight, complete with special leak-proof roof bracket No. 100-7.

The "UTILITY" model has special handle setting, so that when light head is pointed straight ahead, the handle points to rear, thus permitting installation close to windshield.

The "UTILITY" Safetylight, the most efficient and powerful roof light available, is supplied in two sizes. When ordering—specify:

	List Price	Denver & West
"UTILITY" Safetylight, Standard Model, 6"; Complete	\$12.50	\$13.00
"UTILITY" Safetylight, DeLuxe Model, 6½"; Complete	15.00	15.50

Safetylight is backed by national advertising . . . this advertising spells profits for smart jobbers and dealers who tie in with it. Free display stands and literature available to jobbers and dealers.
